

The Next Leap Forward

Experience the Verifii™ Digital Dosimetry Platform—a revolutionary Radiation Safety management system from the industry leader.

Simplify your Dosimetry Program

The Verifii™ Digital Dosimetry Platform completely modernizes the occupational radiation monitoring experience. It seamlessly integrates into your facility with digital dosimeters that securely transfer dose data to Landauer's online system. Data is quickly relayed to and from Landauer for expedient access.

The Platform is flexible, scalable, and can be tailored to support your needs. Plus, it allows for access to all of your LANDAUER dose data via one elegant interface.

A Tailored Platform

Configurations available to accommodate programs of all types and sizes

Custom ALARA limits and read frequency settings for each participant

Two dosimeter options provide solutions for all types of participants

Easy set up and fast system deployment

Feel confident that Landauer stores your data with security and continuity of operations in mind. Landauer has security protocols in place to ensure confidentiality, integrity and availability of your data.

Wall-mounted Badge Board

A Transformative Dosimeter

Verifii™ Digital Dosimeter

- ◀ New solid-state sensor housed in a sleek, modern design
- ◀ Extended wear life
- ◀ Richer data collection, with correlation of activity to dose
- ◀ Screen displaying participant name ensures chain of custody

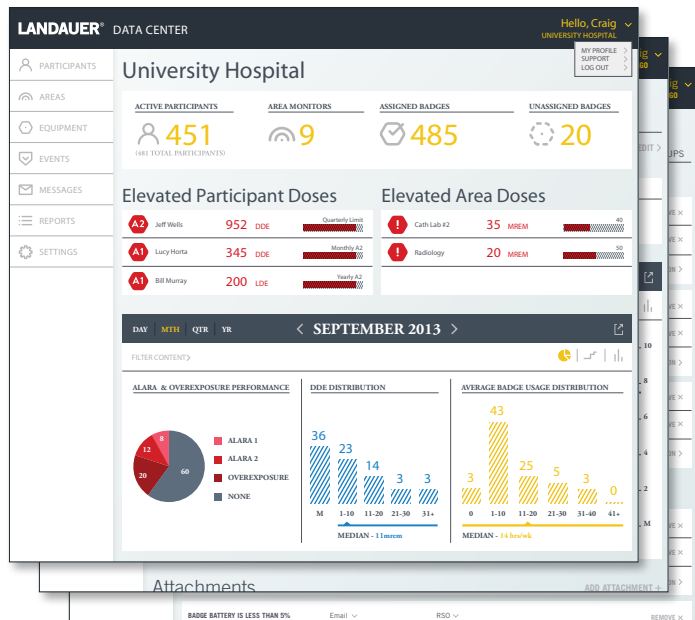

Base Station

Information at your finger tips

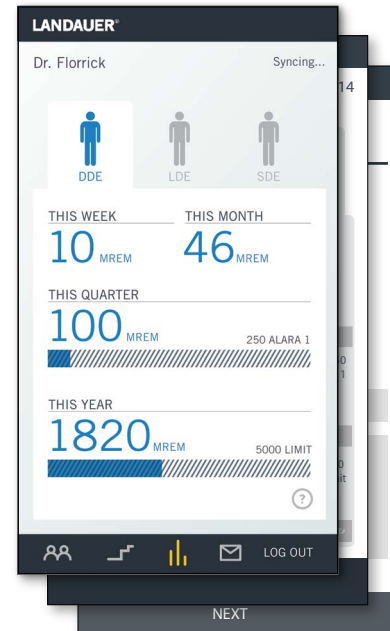

Manage your occupational radiation monitoring program online through our secure web application. Leverage quick access to data, unprecedented data mining, and proactive alerting to better focus on compliance and safety. Simplify processes with automatic documentation of dose data, Events, and communication with participants.

Engage participants by granting access to their personal dose data via a mobile application.

These features, and more, will enable you to spend less time interpreting data and more time working on solutions with your employees.
